Recent narrow escapes along the perturbed Atlantic coast furnish material enough to keep the sea story writers busy for the next century. But some of the happenings are too improbable for romance.

Steangery enough the record for fast time railroading is held by a Southern road, the Sayannah, Florida & Western. On this road 176 miles have been made in 181 minutes. This road has one stretch of sixty miles straightaway.

It was noticed that on the voyage home Mr. Depew and Senator Sherman hardly spoke to each other, Depew and vancing and Sherman retreating. All because both were candidates before the Chicago convention. What big eyes

The West Virginia farmer is looking up, and these occasions induce him to aim at still higher and better things for his farm and for his home. Frequent object lessons have convinced him that there is more for him in breeding good stock than poor; that labor saving machinery pays on the farm as well as in the work shop; that it is possible to reduce the dradgery of the farm and leave the farmer some time to improve his mind through good reading and getting about where new and useful things are to be seen.

This washes out the tenseious mucus and stimulates the gastric glands to secretion. In old and feeble persons water should not be taken cold, but it may be with great advantage taken warm or hot. This removal of the secumniated mucus from the stomach is probably one of the reasons why taking soup at the beginning of a meal has been found so beneficial.

A Simple Sellet for Lung Troubles.

It has long been known that pine needle pillows would alleviate persons afflicted with lung troubles, and a Florida stitur release on the face of until plant on the face of the parts on the face of until plant on the face of the parts on the face of until plant on the face of the earth, and especially in potato the earth, and especially in pota

The potato bug is notoriously a oneidea bug. It has but one aim and one idea;
this is, to ghew potato vines, and it does
so from the time it is hatched until it is
gathered with its fathers in a tin pan or
poisoned on its native vine. But in the
face of all its discouragements the potato
bug manages to thrive. It will look up
graiefully at the hand that showers it
with water loaded with Paris green.

The potato bug has an opportunity of
viewing life from two standpoints; first
in the larve, or worm state, then in the
angelic, or winged state; in either condition it is equally attentive to business,
and, if the expression is permissible,
wings or not, it gets there just the same.

In the early days of the potato bug
raid, an enterprising Yankee advertised
a sure cure for the pest, which would be
made known upon receipt of one dollar.

The agrigulturists bit well, and in two
years he retired upon his income. This
was the formula he returned in exchange
for the dollar:

"Procure two sticks (2), place the bug
between them, apply pressure and rub
the sticks together vigorously. Any bug
treating them all in this manner your
trop will be rid of them,"
